

John I. Kung, M.D.

Orthopedic Surgeon

Fellowship-trained in Hand Surgery

Dr. John Kung is a board certified orthopedic surgeon who specializes in acute injury and chronic issues of the hand, wrist, forearm, and elbow. He enjoys helping weekend hobbyists, amateur and professional athletes, and active seniors get back to the activities of daily living. He deals with arthritis, carpal tunnel syndrome, fractures, lacerations, and occupational injuries. Dr. Kung prefers to take a conservative approach to treatment – one that involves careful listening to ascertain the true problem. When possible, Dr. Kung uses noninvasive treatment options such as bracing, physical therapy, non-steroidal anti-inflammatory drugs, or steroid injections. Should surgery become necessary, Dr. Kung is trained in the latest minimally invasive techniques, which minimize post-operative discomfort and recovery time.
