## Richard Lichtenberg, M.D.

Richard Lichtenberg, M.D., received his medical degree from the University of Illinois. He completed an internship at Louis Weiss Memorial Hospital in Chicago and a residency in diagnostic radiology at University of Illinois Hospital, Chicago. Dr. Lichtenberg also performed a fellowship in neuroradiology at Northwestern Memorial Hospital, Chicago, and a fellowship in interventional radiology at the University of Illinois, St. Francis Medical Center in Peoria, and Rush University Medical Center in Chicago. Dr. Lichtenberg is certified by the American Board of Radiology, with certificates of added qualification in neuroradiology and vascular and interventional radiology.

## Interventional Radiology at Ingalls

Interventional radiologists at Ingalls are board-certified physicians who specialize in minimally invasive, targeted treatments. We combine in-depth knowledge of the least invasive treatments available with diagnostic and clinical experience across all specialties.

As the inventors of angioplasty and the catheter-delivered stent, interventional radiologists pioneered minimally invasive modern medicine. Today, many conditions that once required surgery can be treated non-surgically by interventional radiologists, resulting in less risk, pain and recovery time.
